

Supplementary Material is an html vignette showing an extensive example of the slimr package being used. MEE does not appear to allow .html files for upload, so I have posted the vignette at the following URL for the reviewers and editors to view:

https://rdinnager.github.io/slimr_resources/slimr_example_MEE_Suppl_Material.html

The following github repository has the original .Rmd file used to generate the vignette:

https://github.com/rdinnager/slimr_resources. It additionally has a long workshop tutorial document (slimr_getting_started_workshop_tutorial.Rmd) used in a 1-day workshop to teach the package, available for anyone with additional interest.
